

# SUPER FULL STACK THEME

This is a mock brief to illustrate my design process and skills. Super Full Stack is my open source Bootstrap 4 theme with JavaScript and PHP for added features. I will go through each step of my UX/UI design and development process using Super Full Stack as my real-world project.

## Client:

Super Full Stack - An Open Source Portfolio Theme.

## Description

Develop a new Bootstrap 4 theme for their portfolio page. It should be one page, with a contact form and some projects.

## Who is this for?

Creatives/Entrepreneurs - This product is used by creative individuals i.e graphic & web designers who want to show off their current work. Many graphic & web designers are moving away from managed websites and are learning to use Bootstrap and cloud hosting solutions that require themes.

## Feature List (Product requirements)

- Bootstrap cards for portfolio items.  
The site should be minimal with curated portfolio images and links. The website should deliver the portfolio items swiftly and beautifully in order convert visitors to clients.
- Navigation  
HOME, UX/UI, FRONT END, BACK END and CONTACT
- Repeat links below images as an <a> tag.
- Contact form and font awesome social media icons.
- Sticky Navigation

## Competitors & Product Inspiration

- Bootstrap: <https://themes.getbootstrap.com>
- Start Bootstrap: <https://startbootstrap.com/>
- Bootswatch: <https://bootswatch.com/>

## Deliverables

- Wireframes for client approval.  
PDFs.
- High fidelity prototype.  
PDFs.
- Prototyping wires  
Us InVision for prototyping and sharing on any device or platform, better than XD.
- Links  
Create & share links for both wireframe & high fidelity XD projects.

## Timeline

- You have three days to complete this project.
