

REENA 34 / WEB DESIGNER / SAN FRANCISCO, CA

DESCRIPTION

Reena works as a web designer in San Francisco. Reena loves her work from word of mouth advertising but can see the opportunity to reach more people through her own website. Reena is moving away from managed hosting and wants a custom Bootstrap theme on AWS Lightsail and needs a cool theme.

Reena has a young family and sees a new website to be a way she can earn a little extra passive income. Reena has a strong understanding of websites but is accustomed to managed hosting solutions so using a theme is key.

NEEDS

- More income.
- Convert visitors into clients.
- Not managed and not totally DIY.
- Host using AWS Lightsail.

"I want to move away from managed hosting but I don't want to build the AWS server or write code. I'm looking for a cool Bootstrap theme!"
